DETAILED ACTION

1. The allowance of claims 15, 16, 19, and 20 and the indication of allowability of claims 17 and 18 is hereby withdrawn. The rejection of claims 15-20 follows in this Office Action. Examiner regrets any inconvenience.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 8, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Stewart.

Stewart discloses a hair device simulating the appearance of a dog or cat, as shown in Figures 3-10. The toy comprises a tubular body portion (10) simulating a first part of the anatomy of the given animal. The body portion (10) has two ends and is adapted to have hair wrapped about it between the two ends, since the body portion (10) is capable of having hair wrapped about it. One end of the toy simulates the head (11) of the animal and the other end of the toy simulates the hind end (where hind legs 16 meet the body 10) of the animal. A tail comprising bendable wire is attached to the animal hind portion. The head and hind are made of plastic, as discussed in column 3,

lines 12-21. The means for holding the hair to the body portion comprises appendages (16), which are described in column 4, lines 6-36.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3, 8, 13, 15, 16, and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barrett in view of Gumb and Schneeweis.

Barrett discloses a hair curler (roller R) comprising a body portion about which hair may be wrapped (Figure 1). A means for holding the hair to the body portion includes a pin (20 and 22), as discussed in column 4, lines 10-28. The Barrett does not disclose an animal head portion or hind portion attached to the body. However, Barrett discloses an ornament (O) on each side of the body portion in Figures 3 and 4. The plastic ornaments (O) are illustrated as a flower, but column 2, lines 50-53 state that the ornament can be "a flower or any similar decorative item". Schneeweis and Gumb disclose decorative combs. The decorative ornament in Schneeweis is a plurality of flowers. The decorative ornament in Gumb is a rabbit with a head, a hind end with a tail attached to it, and a middle body section. Together, Schneeweis and Gumb teach that it is obvious to substitute one ornament for another. Specifically, Schneeweis and

Gumb teach that it is obvious to substitute an animal-shaped ornament (rabbit) for a flower-shaped ornament. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include an animal head portion, body portion, and hind portion in place of the flower ornaments, as taught by Schneeweis and Gumb, in order to substitute a another similar decorative item, in this case an animal, for a flower.

6. Claims 10, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barrett in view of Gumb and Schneeweis as applied to claims 1, 3, 8, 13, 15, 16, and 19-22 above, and further in view of Catania.

Barrett discloses the features discussed above, but does not disclose that the body portion comprises a mesh covered coil spring surrounding a bristle brush. Catania discloses a hair curler body portion (roller 12) including a mesh covered coil spring (46) surrounding a bristle brush (50), as described in column 2, lines 35-43. A pin (bottom member 14) passes through the mesh covered coil spring (46) and the bristle brush (50), as shown in Figure 2. It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the body portion of Catania for the body portion of Barrett, since it is an art recognized functional equivalent.
